

Bohdan Kovalchuk

Python & Full Stack Developer

📍 Kyiv, Ukraine ✉ bohd4n@proton.me ☎ +380 77 707 03 30 🐙 [bohd4nx](#) 🔗 [bohd4n.dev](#)

SUMMARY

Fullstack Developer with a strong focus on Python, experienced in building backend services, APIs, and user-facing applications through independent and commercial projects. Currently a first-year university student with a solid technical foundation. Comfortable working autonomously, solving complex problems, and quickly adapting to new technologies. Motivated to grow within a collaborative team and deliver practical, well-engineered solutions.

WORK EXPERIENCE

Python Backend Developer

Jan 2025 - May 2025

Open Builders

Developed backend logic for Telegram Mini Apps using FastAPI and Django, implemented REST APIs, handled database operations, and integrated Telegram APIs and third-party services.

Fullstack Developer (Freelance)

Aug 2024 - Dec 2024

Developed fullstack web applications and landing pages using React, Vue, and Next.js, styled with Tailwind CSS. Implemented backend logic, database interactions, and REST API integrations, as well as basic deployment and maintenance.

Python Developer (Freelance)

Nov 2023 - Jul 2024

Worked on the development of Telegram and Discord bots with moderate complexity, as well as small to medium backend projects using Django, Flask, and FastAPI. Implemented APIs, database interactions, and automation logic.

EDUCATION

Bachelor's Degree

Sep 2025 - Present

CNTU

Kropyvnytskyi, Ukraine

Secondary education

Sep 2022 - May 2025

Naukovyi Lyceum

Kropyvnytskyi, Ukraine

SKILLS
